SUMMARY

Software Engineering undergraduate passionate about building efficient, user-focused software solutions. Interested in AI/ML, AI-powered development, and modern software engineering practices. An enthusiastic, adaptable, and fast-learning individual currently seeking internship opportunities to gain hands-on industry experience and contribute to meaningful projects.

EDUCATION

Noakhali Science and Technology University <i>B.Sc. in Software Engineering, Institute of Information Technology (IIT) — CGPA: 3.48 / 4.00 (upto 5th semester)</i>	Noakhali, Bangladesh 2023 – present
Chattogram Cantonment Public School & College <i>Higher Secondary Certificate (HSC) -Concentration: Science - GPA: 5.00 / 5.00</i>	Chattogram, Bangladesh 2020
Chattogram Cantonment High School <i>Secondary School Certificate (SSC) - Concentration: Science - GPA: 5.00 / 5.00</i>	Chattogram, Bangladesh 2018

TECHNICAL SKILLS & CERTIFICATIONS

Programming Languages & Core Concepts: C, C++, Java, Python, JavaScript, Data Structures & Algorithms, Object-Oriented Programming

Frontend Development & UI/UX: ReactJS, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma

Backend & AI: Node.js, Flask, Serverpod, OpenCV, MediaPipe

Mobile & Desktop Development: Flutter, Dart, Java Swing

Databases & Developer Tools: PostgreSQL, MySQL, Supabase, Git, GitHub, Docker, VS Code

Certifications: Database Management with MySQL - EDGE Certification

Club Activities: Associate Member - IT Club, NSTU

PROJECTS

- 1.Connect 4 Game | Java (Swing-based GUI Desktop Application) | [GitHub](#)** Mar 2024 – May 2024
 - Built a classic Connect 4 strategy game as part of a course project where players (PvP / PvC) compete to align four pieces in a row.
 - Implemented AI game logic using Minimax algorithm with Alpha-Beta pruning for optimizing computer move.
- 2.Shadow-Text | Java(Swing-based GUI Desktop Application) | [GitHub](#)** July 2025
 - Built a cryptography and steganography tool that encrypts messages using AES encryption and conceals them inside images.
- 3.NSTU Medical Center App | Flutter, Dart, Serverpod, PostgreSQL | [GitHub](#)** Aug 2025 – Dec 2025
 - Developed a Flutter-based digital healthcare application as part of a course project to digitize medical services within NSTU.
 - Improved the efficiency of medical service access by digitizing manual processes and centralizing patient information within a single platform.
- 4.Venue Booking Portal | React, Supabase, Tailwind CSS, PostgreSQL | [GitHub](#)** Jan 2026
 - Developed a venue booking system allowing users to browse, search, and book event venues efficiently.
- 5.SignBridge | Python, Flask, OpenCV, MediaPipe, pyttsx3 | [GitHub](#)** 2026
 - Developed a real-time assistive communication system for sign language recognition using OpenCV and MediaPipe Hands.
 - Built a Flask-based dashboard with live webcam feed, emergency alerts, and speech synthesis using pyttsx3.
